INFORMATION TECHNOLOGY and the AUTOMATED OFFICE

Of the many thousands of vitally important articles to be published throughout the world on Information Technology and the Automated Office during the next twelve months

HOW MANY WILL YOU SEE?

.....

IT FOCUS—the *NEW* monthly digest

IT FOCUS

. . . scans the published information

. . . selects the significant facts and opinions

. . . and presents time-saving summaries for the busy executive.

IT FOCUS covers all aspects of IT:

. . . hardware, such as micros, word processors and local networks

. . . communication systems, e.g. tele-conferencing, viewdata and electronic publishing

. . . applications: to business, the professions, industry, education, health care, etc.

COMPUTER AND CONTROL ABSTRACTS

A Complete information Service in Computer Science and Control Engineering

Coverage

Over 40,000 references are included each year. These are selected by scanning over 3,000 journals and the proceedings of over 1,000 conferences.
In addition coverage is given of books, reports and dissertations.

What Information is Included?

Each reference in CCA includes the following information:
Title of paper
All authors' names and affiliation of first author
Source of paper (eg name of journal, volume and issue number, page numbers and date of publication)
100-150 word abstract.

Ease of use

Careful classifying and indexing of entries puts information at your fingertips. References are classified under 250 headings, allowing you to go straight to the information of most interest to you. (A summary of the classification appears in every issue).

These six separate indexes are included in each issue:
Subject guide
Author index
Bibliography index
Book index
Conference index
Corporate author index

The above indexes are cumulated at six-monthly intervals. The author and subject indexes are also cumulated at four-yearly intervals*.

Do You Have Access to This Important Journal?

Does your library or information service provide you with access to this important journal? If not, ask your librarian to contact INSPEC for a free sample and subscription details or write to us direct.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database. Information is dispatched weekly on 150 mm × 100 mm (6″ × 4″) cards.

TOPICS

This is an SDI service based on standard profiles. There are over 90 subjects covering high-activity areas of research and devlopment. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

JAPAN UPDATE

Six high-technology subjects are covered by Japan Update services. Abstracts are provided for articles selected from over 250 Japanese journals and despatched weekly on conveniently-sized cards. This inexpensive service is designed to help engineers stay abreast of technological developments reported in the Japanese literature.

MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their own internal information and current-awareness services.
